

## Curriculum Vitae

- Name : Kunal Raut
- Mobile : +91 - 9923363569
- Email : kunalraut6@outlook.com
- Location: Pune, Maharashtra, India.

## Profile Summary

- **3+ years** of IT experience in designing and developing and maintenance of application Health domain web and Enterprise applications using multiple technologies like React.js, Redux, Hooks, JavaScript, CSS, HTML.
- Knowledge designing the applications, creation of technical documents.
- Working experience on React.js, Redux and Hooks.
- Good Knowledge on Node.js (Rest API) and MongoDB.
- Working Knowledge on Styling Technologies like CSS,CSS3,HTML,HTML5.
- Experience on Handling Flexbox layout also Learning Knowledge on Tailwind.
- Knowledge of professional software engineering practices & best practices for the full software development life cycle, including coding standards, code reviews, source control management, build processes, testing, and operations.
- Learning Knowledge on AWS and Jenkins.
- Profound Knowledge and Expertise in complete Software System development life cycle (**SDLC**) including design, development, implementation, integration, testing and maintenance, bug fixing.  
Involved in the requirement gathering, design requirement, deployment support with the client.
- Knowledge of functional testing of Enterprise applications during System Integrated testing (SIT) as well as User acceptance testing (UAT).

### Educational Qualification:

Sr.no.	Qualification	Board/University	Percentage
1)	B.E. (ECE)	SGBAU	87%
2)	12 <sup>th</sup>	State Board	60%
3)	10 <sup>th</sup>	State Board	79%

### **Summary of Technologies Used: -**

Sr.no	Technology Stack
1	React.js
2	Redux,Hooks,Axios,Middleware
3	JavaScript
4	CSS,CSS3,HTML,HTML5
5	MySQL, MongoDB
6	Node.js API
8	Basic Database concept, SQL Queries, Stored Procedure ,Google Data Studio
9	Basic AWS Lambda
10	Tools – Remedy,JIRA, Win Scp, Postman.

### **PROFESSIONAL EXPERIENCE**

- **Project Name** : **IDMA Dashboard**
- **Skill Sets** : React.js, Redux, Hooks
- **Servers** : AWS (Cloud front).
- **Role** : React Developer
- **Duration of the Project** : June 2020 – till date.
- **Description** : -

This is a Web based Project developed to help Business to hold their procedural action on Patient/HCP for their Business. The application provides the detail of the Patient/HCP and their current status, so that they can increase their patients/HCP efficiently/effectively. The detail report generation of the Patient/HCP provide the total log of disease/medicines/equipment involved/used over a period. It provides the user with the appropriate health plan and treatment with analysing the data captured over the years.

User (Business) can perform report generation in PDF format of As per requirement for a patient /HCP and log his/her report of patient which then will be graphically represented for better understanding of increase of business.

- **Responsibilities** :
  - 1) Requirements Gathering, Requirement Analysis, Designing the Technical Documents.
  - 2) Designing, Planning and developing the requirement provided within the given timelines.
  - 3) Perform Production Deployment, Unit testing, System Integrated Testing, coordinating with the client for performing User Acceptance Testing (Q/A).

- **Project Name** : **IDMA Dashboard**
- **Skill Sets** : React.js.
- **Servers** : AWS (Cloud front).
- **Role** : Application Support And Maintenance
- **Duration of the Project** : June 2019 – Dec 2020
- **Description** : -

This is a Web based Project developed to help Business to hold their procedural action on Patient/HCP for their Business . The application provides the detail of the Patient/HCP and their current status, so that they can increase their patients/HCP efficiently/effectively. The detail report generation of the Patient/HCP provide the total log of disease/medicines/equipment involved/used over a period. It provides the user with the appropriate health plan and treatment with analysing the data captured over the years.
